online travel. Our flagship Travel Distribution Summits in North America, Europe, Asia and most recently India are the industry meeting places for travel e-commerce and technology executives in these regions. These events attract between 400 and 2000 attendees. Speakers include many of the industry's leading strategists and innovators and as such the events help to shape the future of travel distribution. In addition to the Summits, we also run numerous highly focussed conferences on business critical topics including revenue management, social media, ancillary revenue, online marketing, internet content, distribution technology and more. Such is the popularity of these events that many are repeated year after year, and across all the regions that we serve globally. We pride ourselves on our unparalleled research which allows us to create conference agendas which truly reflect the needs and business concerns of today's travel executive.
